

Managing Insider Threat Through Behavioural Analytics

Cyber Defence powered by Machine Learning
and Artificial Intelligence

What are the issues

Managed Behavioural Analytics Cyber Immunity

Learns 'self' in real time

For every user, device, and network, using unsupervised machine learning

Detects and responds to all threat types

Insider threats, criminal attacks, data exfiltration and manipulation, IoT hacks and supply chain threats

100% visibility

Visualizes entire network, including traditional and non-traditional IT, allows both real-time and retrospective investigations

Scalable

From 12 users to over 1 million devices

Deploys on premise & cloud

Defends physical and virtual networks, cloud, ICS, SaaS

Simple Benefits

- Self Configuring
- Automatically learns “normal” for every device, user & network
- Results from Day 1
- 24/7 SOC support, threats & risks notified in real time
- SOC monitoring of logs, incident reports, anomaly threats and insider risks
- Prioritised reports delivered for both technical and executive audiences
- No custom models required
- We monitor the whole network, reducing reliance on “known bad” maintenance
- Release you IT teams to focus on core goals

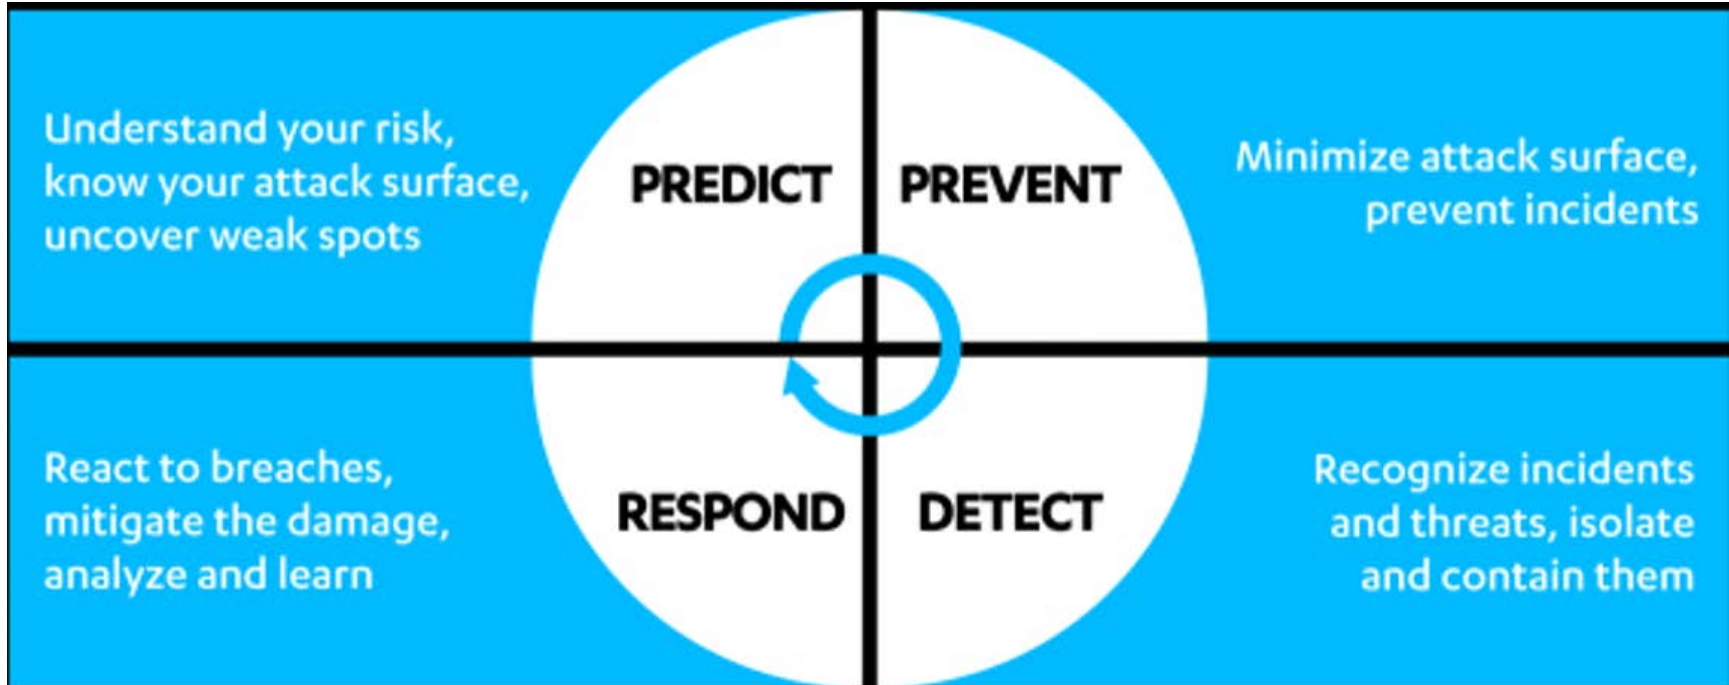

Why are customers buying MNBA

- Legacy security strategies are no longer sufficient
- Machine learning and AI are critical in identifying evolving threats
- Self learning allows our service to continually adapt
- Proven to identify all threat types
- 100% coverage including cloud, hybrid, on-premise, SAAS
- Fight back in real-time with 24/7 SOC support
- Real-time remediation

The ITC Threat Model
