BEHAVIOURAL ANALYTICS

About ITC

Established in 1995, ITC Secure Networking provides organisations with assured IT. We design and integrate secure cloud-based and on premise IT network infrastructures that enhance performance, safeguard information and simplify management – **Delivering Secure Performance on AnyDevice, AnyWhere, AnyTime!**

Over the last two decades we have built and secured Domestic, European and Global IT networks for some of the UK's best known organisations, all managed from our state-of-the-art Secure Operations Centre in London. ITC are the leading **cloud-based MSSP** delivering service innovation in cyber security analytics & cloud technology.

NetSure360°, our Managed Services Platform, is our **"Jewel in the Crown"**, it's what identifies ITC and delivers value to all our customers by providing complete 360° visibility, control and assurance over our customers key assets 24x7x365.

Scalable Enterprise grade Managed Security Service for businesses of all sizes

Cyber-attacks are now headline news. Week after week we see staggering numbers as compromised customer accounts incur huge costs and brands suffer significant damage as shareholders and customers lose confidence.

Behavioural Analytics protects your organisation from anomalies against the network norm and insider threats. Delivering security and compliance in a world of ever growing risk.

NetSure360° Managed Network Behavioural Analytics

Why
Monitor insider threat
Analyse user behaviour
Identify unknown threats
IT resource efficiency
Asset visibility
Increasing regulatory pressure

The Benefits
Fully managed service 24/7 monitoring
Expert support from SOC
Threats rapidly identified & escalated
Real time remediation
Weekly threat reports

Managed Network Behavioural Analytics

Why MNBA

Cyber-attacks are now sophisticated and skilled, they may be hidden in your network for months before taking action. Traditional and legacy security systems can take hundreds of days to identify this threat.

Insider threat has the potential to be the most damaging risk, it is founded on familiarity with your organisation and privileged access to your crown jewels.

The traditional legacy approach of building higher and higher walls, no longer is enough to protect or ensure compliance

What is MNBA from ITC

NetSure360˚ MNBA is an Enterprise grade threat detection capability, based on machine learning and probabilistic mathematics, it observes and analyses your user devices and network activity. It learns your organisations way of life and detects anomalies and threats in real time.

MNBA supports cloud based, on-premise and hybrid technologies

Here at ITC, our 24/7 Security Operations Centre (SOC) can easily understand and identify potentially damaging anomalous behaviour, we'll notify you and assist in remediating threats and risk in real time.

Our Managed Security Services deliver specialist capability, taking the pressure off your IT teams, we'll monitor logs, incident reports, anomaly threats and insider risks, alerting through prioritised, consumable reports for both technical and executive audiences.

We monitor the whole network and reduce reliance on "known bad" maintenance, releasing your IT teams to concentrate on core goals.

Staying ahead of Regulation

NetSure360˚ MNBA provides greater visibility of traffic on your network, allowing for live and historical interrogation of network activity. With GDPR demanding that organisations follow strict compliance laws, MNBA helps you gain a better understanding of what data you hold, where that data is and how it is used.

Integrate NetSure360° MNBA into your Existing Security Infrastructure

Whether looking for a new cyber security solution or enhancing existing systems or established NetSure360˚ services, talk to us about how we can integrate and improve your cyber defence and threat intelligence.
